Education

University of Connecticut / BSC(CS)

AUGUST 2010 - MAY 2014, STORRS, CT

Studied Computer Science and Software Engineering with a focus on Java.

Gained a foundational knowledge of many different programming languages and paradigms, algorithmic complexities of data structures, as well as software design principles and life-cycles.

Skills

Vue.js, Node.js, Express.js, MongoDB, Webpack, JavaScript, Git, SCSS, jQuery, Wordpress, PHP, MySQL

Experience

Kathy Kuo Home / Front End Web Developer

JANUARY 2018 - SEPTEMBER 2018, HARLEM, NY

- Worked with CEO and lead UX designer to strategize new features and sprints for <https://www.kathykuohome.com> such as the homepage redesign.
- Developed new components with C# in a .NET MVC environment.
- Optimized previous front end code and fixed outstanding script errors resulting in a 60 point increase to [Google PSI](#) score and a 3 second reduction in average page load speed.
- Developed entire sister-site <https://www.kathykuohome.com/designbar>

Archi FX LLC / Freelance Developer

JULY 2017 - JANUARY 2018, REMOTE

- Created reusable UI components and responsive layouts for new and existing ArchiFX websites.
- Fixed page errors and automated asset optimization with Node.
- Wordpress theme customization.

Healthcasts / Web Developer

JANUARY 2017 - JULY 2017, NEW YORK, NY

- Developed product microsites based on the Healthcasts design guide using HTML, CSS, and jQuery.
- Daily team meetings and collaboration with designers.
- Worked with Creative Director to develop a new product site

featuring heavy user interactivity and CSS animations.

- Created a modern front-end build toolchain using Node.js and NPM for other developers to use as a starting point.

Finalsite / Front End Web Developer

SEPTEMBER 2014 - NOVEMBER 2016, GLASTONBURY, CT

- Developed custom websites for schools using HTML, SCSS, jQuery, Gulp, and Git in a custom CMS environment.
- Worked with a large team of developers, designers, and project managers. Weekly SCRUM meetings and code reviews.
- Built out over 30 projects each with their own unique client and design requirements:
